

*Amor filiorum.*

Ante diem uernam boreali cana palumbes  
 Frigore nidificat, præcoqua & oua fouet,  
 Mollius & pulli iaceant sibi uellicat alas,  
 Queis nuda hyberno deficit ipsa gelu.  
 Ecquid Colchi pudet, uel te Progne improba, mortē  
 Cum uolucris propriæ prolis amore subit?
